

## PASTEUR4OA: Advocacy Resources for Higher Education Institutions (HEIs)

### Overview

**PASTEUR4OA** is a multi-stakeholder project that brings together 15 partners from 10 European countries. PASTEUR4OA aims to increase national and institutional policymakers' as well as research funders understanding and awareness of Open Access (OA).

### Advocacy Resources<sup>1</sup>

A priority of the PASTEUR4OA project is to provide information and resources to relevant stakeholders and policymakers across Europe that can support them in developing and implementing OA policies, as well as in reinforcing and aligning existing policies. Accordingly, a series of **advocacy resources** have been produced as part of the PASTEUR4OA project that seek to address the different needs of stakeholders at the national, university and funder levels.

In the UK, where 85 universities and some estimated 35 research funders have already adopted OA policies, there is scope for HEIs to either develop new OA policies or to reinforce existing ones. Accordingly, UK HEIs can make use of the PASTEUR4OA **advocacy resources** to inform the development, reinforcement and effectiveness of OA policies. Below is a sample of the resources that are available **online**.

<b>Open Access policy templates and guidelines</b>	<ul style="list-style-type: none"> <li>Template and guidelines for Open Access policy implementation by research institutions [<a href="http://goo.gl/Fzw8F3">http://goo.gl/Fzw8F3</a>]</li> <li>Template and guidelines for Open Access policy implementation by research funders [<a href="http://goo.gl/qOEXSy">http://goo.gl/qOEXSy</a>]</li> </ul>

## The PASTEUR4OA project

PASTEUR4OA aims to increase national and institutional policymakers' as well as research funders understanding and awareness of Open Access (OA). PASTEUR4OA also aims to help develop and/or reinforce OA strategies and policies at a national, university and research funder levels that align with the European Commission's 2012 **Recommendation on Access to and Preservation of Scientific Information** and the **Open Access Mandate for Horizon 2020**. Furthermore, it aims to facilitate coordination among all EU Member States and Aligned Countries by establishing a network of expert organisations across Europe – the Knowledge Net – and by developing a collaborative programme of activities that support policymaking at the national, university and funder levels.

The benefits of promoting the development and implementation of OA policies are that it enables more scientific information to become freely available online. The advantages of promoting the alignment of OA policies include the contribution towards: creating a simpler policy landscape for researchers; increasing the prospect that researchers comply with OA policies (institutional and/or funder); and reducing the burden on academic support staff who need to provide advice on OA policies, as well as monitoring and reporting on policy compliance.

To achieve its aims, PASTEUR4OA has been engaged in the following activities:

- Performing **evidence-based research** to inform policy development.
- Identifying policymakers** in EU Member States and Aligned Countries and **engage** with them to assist in coordinated and aligned policy development.
- Creating a network** – Knowledge Net – of national centres of expertise who will work collaboratively to monitor and champion an aligned policy environment across Europe in the long-term.
- Facilitating policymaker engagement** in EU Member States and Aligned Countries through a series of **workshops** for research funders and for research institutions policymakers.
- Developing **advocacy resources** that will be disseminated to policymakers and that include information on policy formulation, good practice, effectiveness and alignment.

## Further information

For further information on the PASTEUR4OA project or the advocacy resources please visit the PASTEUR4OA website on <http://www.pasteur4oa.eu/resources>
